- (2) The Parliament does not intend by this Part—
 - (a) to create in any person any legal right or give rise to any civil cause of action; or
 - (b) to affect in any way the interpretation of any Act or law in force in Victoria.

5 Principles for children

- (1) The development and provision of services for children and families should be based upon the fundamental principles that—
 - (a) society as a whole shares responsibility for promoting the wellbeing and safety of children;
 - (b) all children should be given the opportunity to reach their full potential and participate in society irrespective of their family circumstances and background;
 - (c) those who develop and provide services, as well as parents, should give the highest priority to the promotion and protection of a child's safety, health, development, education and wellbeing;

-
- (d) parents are the primary nurturers of a child and Government intervention into family life should be limited to that necessary to secure the child's safety and wellbeing, however, it is the responsibility of Government to meet the needs of the child when the child's family is unable to provide adequate care and protection;
- (e) every child should be able to enrol in a kindergarten program at an early childhood education and care centre.
- (2) Services for children and families should be designed and developed—
- (a) to readily identify harm and damage to the child and to provide for intervention by providers of services to remove or ameliorate the causes of that harm or damage and to strengthen the capacity and efforts of parents, their families and communities to support the child as early as possible in the child's life;
- (b) to accord with the needs of each local community with the active involvement of that community's cultural groups, and to be accessible and responsive to the particular cultures, languages and circumstances of the community and to be properly planned and co-ordinated with services provided by other local and regional communities;
- (c) to give the highest priority to making appropriate and sufficient levels of assistance available to children and families in communities or population groups that are known to have the greatest need;
- S. 5(1)(d) amended by No. 22/2008 s. 41(a).
- S. 5(1)(e) inserted by No. 22/2008 s. 41(b).

-
- (d) to promote continuous improvement in the quality of those services, based on the best available knowledge of the needs of children and their stages of development.
- (3) The providers of services to children and families should—
- (a) protect the rights of children and families and, to the greatest extent possible, encourage their participation in any decision-making that affects their lives;
 - (b) acknowledge and be respectful of the child's individual identity, circumstances and cultural identity and be responsive to the particular needs of the child;
 - (c) make decisions about intervention by the providers of services into a child's or family's life and about access by a child or family to those services in a timely manner being mindful of any harmful effects that may be caused to the child by a delay in making decisions or providing services;
 - (d) ensure that families are made aware of the services available to them and of the benefits these services can provide, especially to those families in most need of assistance;
